Many taxis are multi-destination, and some can carry up to 26 passengers. At the airport in particular, drivers will often wait to fill their vehicle before departing. This can cause a major delay in your arrival time to the marina, which should only be a 20-30 minute taxi ride.

Renting a car instead of hiring a taxi can actually be quite the savings, especially if you're doing your own provisioning or having dinner outside of the marina.

PLEASE REMEMBER TO TIP YOUR DRIVERS

Licensed taxi vehicles are labeled with: a taxi placard or dome light on the roof, license plates that indicate Taxi status, On Duty/Off Duty sign in the window of the vehicle and a sign, usually on the fender, indicating passenger capacity. The drivers' personal identification/taxi license should be on the vehicles dashboard.

Although rates are standardized it is recommended that you speak to the driver and agree to your total rate (for you, your group, your luggage, waiting, tour) before boarding the taxi.
